

Sujith Kumar Anand

Senior Product Design Manager — a design leader who still ships

Eleven years of product design, most recently in fintech, turning complex products into ones people trust. I lead the team, build the ways of working that let it scale, and still ship front-end with AI. Rooted in HCI research; grounded in engineering.

Career

2014 — today

Experience

9 roles

FYERS

2024 — Present

Senior Product Design Manager Current

- Lead product design across seven verticals for an Indian brokerage with over a million customers, reporting to the AVP of Product, with a team of five designers today (eight at its largest).
- Led the team through two organisational changes as design moved into Product: from three verticals under the CXO to every vertical, then seven once the load was rebalanced.
- 33 features shipped since February 2024, 24 of them after May 2025, including eight of the nine flagship launches, among them FYERS Automate, Stock Screeners, Strategy Builder and Fixed Deposits.
- Each designer owns a problem end to end; I set the quality bar and review every design after its product manager.
- Three revamps of how the product looks in seven months, August 2025 to March 2026, run under my management.
- A leading voice for moving from a split UX/UI relay to end-to-end Product Designers.
- Delivered Wealth 360 end to end — PRD and an AI-generated concept through to Flutter-ready web and mobile; the front-end team estimated roughly 70% less front-end effort.
- Leading AIDA, an internal agentic design framework that takes designers and product managers from idea to Flutter code; proven on Wealth 360, now rolling out across design and product.
- Two in-house hiring drives as the CXO's design organisation grew to 28 people; ran the second round, ahead of the final round.

Nexter Finance

2022 — 24

Design Lead · web3 / DeFi

- Took a decentralised prediction market (crypto, stocks, commodities and real-world events) from zero to launch; led and personally designed desktop and mobile web.
- Proposed launching Lossy Predictions first and a phased release, so the team shipped while scope was still moving; ran usability testing with six users. By January 2024 it had handled \$19M+ in volume and 1.7M+ predictions, and earned \$242K in fees.

Oddz Finance

2021 — 22

Design Lead · DeFi

- Led design of complex trading and options flows for non-expert users.

Datami 2018 — 21	Senior Product Designer → Lead Product Designer — Airtel TV Africa — the only designer, end to end, for 14 African markets; 450,000+ registered users in the first three by 2020. — Reach Mobile — one of its first two designers, from zero to launch; led the website and mobile web, where 98% of sales happened, and rebuilt the purchase flow.
Two Roads Tech (Qplum) 2017 — Mar 18	Product Designer — Owned all web journeys for Qplum, an AI-based portfolio-investment platform for US investors.
Onetech Ventures Oct 2016 — Apr 17	UX Specialist · Bangalore — Web applications end to end — requirements gathering, interviews, design walkthroughs, empathy and scenario maps, wireframes, UI and prototypes.
IBM Studios, Böblingen Feb — Jun 2016	UX Design & Research Intern — IBM BPM Process Portal — two projects from paper sketches and wireframes through interviews and design walkthroughs with business partners and internal users.
emocial Ltd · freelance 2015 — 16	UX Design · London — Responsive web applications — personas, information architecture, task flows, wireframes and prototypes; plus a freelance engagement for a London non-profit.
Microsoft 2014 — 15	UX Research · United Kingdom — Field research on care technology with UCL & Kent County Council — interviews, diary studies, usability testing.

Education
